Delivered via email

Dear Mr. Gunasekaran:

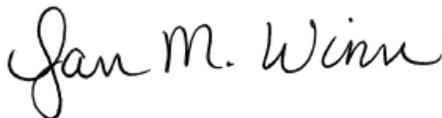

The nuclear medicine technology program at University of Iowa Hospitals and Clinics is scheduled for self-study submission and on-site evaluation in 2023. The Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) chose to move some programs, with their approval, to a later year to achieve greater consistency in the number of programs undergoing reaccreditation annually.

The JRCNMT reviewed the accreditation history, length of service of the current program director, history of substantive changes, and the certification exam pass rate of each program scheduled for reaccreditation in 2023. Based on review of these criteria, the nuclear medicine technology program at University of Iowa Hospitals and Clinics was identified as a candidate for extension of accreditation. The program director was contacted earlier this year and confirmed the program's willingness to make this change.

On October 22, 2021, the JRCNMT voted to extend the program's accreditation two years. This moves the next review for continued accreditation from 2023 to 2025. Annual reports will continue to be required each summer.

Notification of this decision will be forwarded to the institution's accrediting agency. The information will also be made available to the public on the JRCNMT website. The JRCNMT extends best wishes for continued success in the operation and on-going improvement of this educational program.

Sincerely,

Jan M. Winn, MEd, RT(N), CNMT
Executive Director

cc: Anthony Knight, PhD, RT(N), CNMT, NCT
Nuclear Medicine Technology Program Director

May 2, 2018

Kenneth Kates, MBA
Chief Executive Officer
University of Iowa Hospital & Clinics
1353 JCP / 200 Hawkins Dr
Iowa City, IA 52242

Dear Mr. Kates:

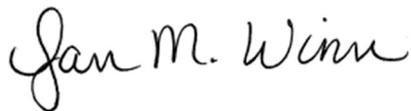

In 2017 the nuclear medicine technology program sponsored by University of Iowa Hospital and Clinics received continued accreditation for three (3) years from the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Extension of accreditation to the full term was contingent upon submission of a progress report satisfactorily addressing deficiencies in compliance with specific accreditation standards.

Based on the information provided in the program's progress report, the JRCNMT voted on April 27, 2018 to extend accreditation three (3) additional years. A mid-cycle report will be required in 2020 and the next evaluation for continued accreditation will occur in 2023.

Notification of this decision will be forwarded to the institution's accrediting agency. The information will also be made available to the public on the JRCNMT website.

The JRCNMT extends best wishes for continued success in the operation and on-going improvement of this educational program.

Sincerely,

Jan M. Winn, MEd, RT(N), CNMT
Executive Director

cc: Anthony Knight, PhD, RT(N), CNMT, NCT - Program Director
Tyler Artz, MBA, MHA - Director of Radiology Administration
