November 19, 2018

Jerry Weber, PhD
President
Bellevue College
3000 Landerhold Circle SE
Bellevue, WA 98007

Dear Dr. Weber:

The nuclear medicine technology program at Bellevue College is scheduled for self-study submission and on-site evaluation in 2020. The Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) has more programs slated for review in 2020 than it can evaluate in one year so the decision was made to move some programs, with their approval, to a later year to achieve greater consistency in the number of programs undergoing reaccreditation annually.

The JRCNMT reviewed the accreditation history, length of service of the current program director, history of substantive changes, and the certification exam pass rate of each program scheduled for reaccreditation in 2020. Based on review of these criteria, the nuclear medicine technology program at Bellevue College was identified as a candidate for extension of accreditation. The program director was recently contacted to confirm the program's willingness to make this change.

On November 2, 2018, the JRCNMT voted to extend the program's accreditation two years. This moves the next review for continued accreditation from 2020 to 2022. Annual reports will continue to be required each summer and a special compliance report addressing the revised 2018 accreditation standards will be due in 2019.

Notification of this decision will be forwarded to the institution's accrediting agency. The information will also be made available to the public on the JRCNMT website. The JRCNMT extends best wishes for continued success in the operation and on-going improvement of this educational program.

Sincerely,

Jan M. Winn, MEd, RT(N), CNMT
Executive Director

April 8, 2014

David Rule, PhD
President
Bellevue College
3000 Landerholm Circle SE
Bellevue, WA 98007

Dear Dr. Rule:

In 2013 the nuclear medicine technology program sponsored by Bellevue College received continued accreditation for two years from the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Extension of accreditation to the full seven-year term was contingent upon submission of a progress report satisfactorily addressing cited deficiencies in compliance with published accreditation standards.

Based on the information provided in the program's progress report, the JRCNMT voted on April 4, 2014 to extend accreditation five additional years. The next evaluation of the program for continued accreditation will occur in 2020, with a mid-cycle report due in February 2017.

Notification of this decision will be forwarded to the institution's accrediting agency. The information will also be made available to the public on the JRCNMT website.

The JRCNMT extends best wishes for continued success in the operation and on-going improvement of this educational program.

Sincerely,

Jan M. Winn, M.Ed., RT(N), CNMT
Executive Director
