Frederick Keating, EdD
President
Rowan College of South Jersey
1400 Tanyard Rd
Sewell, NJ 08080

Sent by email with receipt confirmation

Dear Dr. Keating:

Earlier this year, the nuclear medicine technology program at Rowan College of South Jersey completed the self-study and site visit process for continued accreditation by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Last week, the JRCNMT reviewed the evaluation of the program’s self-study and the Letter of Site Visit Findings. Evidence indicated the program is not in compliance with one requirement in the Accreditation Standards for Nuclear Medicine Technologist Education, therefore, the program was placed on accreditation with conditions for one year.

The following deficiency warrants attention and resolution to achieve full compliance with The Standards:

   E3.3 Radiation exposure records shall be reviewed with each student at regular intervals (not less than quarterly). Documentation of these reviews, including a dated acknowledgement by the student, must be maintained.

   Although dosimetry reports were reviewed by the students and initialed, they were not dated by the students. The program plans to implement a new procedure that includes dated signatures.

An assessment of all clinical affiliates during the accreditation process determined that the program can accommodate up to 10 students in the clinical education portion of the program. The following institutions are recognized as affiliates of the program:

<table>
<thead>
<tr>
<th>Affiliate</th>
<th>Location</th>
<th>Capacity for Program</th>
</tr>
</thead>
<tbody>
<tr>
<td>AtlantiCare RMC Mainland Campus</td>
<td>Pomona, NJ</td>
<td>1</td>
</tr>
<tr>
<td>Cape Regional Medical Center</td>
<td>Cape May Court House, NJ</td>
<td>1</td>
</tr>
<tr>
<td>Jefferson Washington Township Hospital</td>
<td>Turnersville, NJ</td>
<td>2</td>
</tr>
<tr>
<td>Nazareth Hospital</td>
<td>Philadelphia, PA</td>
<td>1</td>
</tr>
<tr>
<td>Perelman Center at the Hospital of the University of Pennsylvania</td>
<td>Philadelphia, PA</td>
<td>4</td>
</tr>
</tbody>
</table>
The JRCNMT requests a progress report no later than **August 1, 2023** demonstrating that the deficiency has been resolved. Evidence of multiple cycles of radiation dosimeter reports, signed and dated by students, should be in the report. The JRCNMT also requests that new data for affiliate Nazareth Hospital, on Forms CL-A, CL-B and CL-C, be included in the progress report.

After review of the report by the JRCNMT at their fall 2023 meeting, conditions may be removed and accreditation continued if the program has come into compliance with this standard. If the deficiency remains, continued accreditation may be deferred and/or the program may be placed on probation. With either of these actions a second progress report would be required and a focused site visit may be necessary.

The program remains accredited, with conditions, and this information will be made available to the public through the JRCNMT website and its publications.

The JRCNMT is confident that the program has the ability to come into full compliance with the *Standards*. If program officials require assistance in preparing the progress report, they should contact the JRCNMT office.

Sincerely,

Jan M. Winn, MEd, RT(N), CNMT
Executive Director
