Dear Dr. Rao:

Upon completion of a review for continued accreditation in 2021, the nuclear medicine technology program at Virginia Commonwealth University was placed on probation for one year by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Removal of probation and continuation of accreditation was contingent upon submission of two satisfactory progress reports and completion of a focused on-site evaluation in 2022 that demonstrated the program’s compliance with the cited standards.

At their meeting on November 4-5, 2022, the JRCNMT evaluated the progress reports and the focused visit Letter of Findings. Documentation indicated that all previously identified deficiencies in compliance with published accreditation standards were satisfactorily addressed. As a result, the JRCNMT removed the program from probation and continued its accreditation for six years. A mid-cycle report will be requested in 2025 and the program’s next review for continued accreditation is scheduled to occur in 2028.

Notification of this decision will be forwarded to the institution’s accrediting agency. The information will also be made available to the public on the JRCNMT website.

The JRCNMT extends best wishes for continued success in the operation and on-going improvement of this educational program.

Sincerely,

Jan M. Winn, MEd, RT(N), CNMT  
Executive Director
