Distributed by email with receipt confirmation

Dear Dr. Hemphill:

At its meeting on October 13-14, 2023, the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) evaluated the Annual Report submitted by the nuclear medicine technology program at Old Dominion University. Upon review of the Annual Report, the board determined that the program continues to be deficient in meeting Standards D.3.1b and D.3.4, which were cited in 2022. Accordingly, the board extended probation one additional year. Compliance issues resulting from the board's review are provided below. Feedback from the Annual Report reviewers is provided on the page attached to this letter.

Compliance Issues on Annual Report

D3.1b Assessment of program effectiveness must, at a minimum, document the regular collection and analysis of graduate performance on the national certification examinations.

Within the Annual Report, on Form L: Program Effectiveness, the JRCNMT sets a benchmark of 80% as a rolling three-year pass rate for first-time examinees on the national certification examinations. The program's pass rate for 2020-2022 is 66%. This is the fifth consecutive year it has been below the benchmark, though it trended upward in this year's report.

D3.4 The results of ongoing assessment must be appropriately reflected in the curriculum and other dimensions of the program. In particular, the program must systematically document the application of assessment results in the process of program improvement.

Form L in the Annual Report, and the program's previous Pass Rate Progress Reports, have provided plans to address the program's low certification exam pass rate that have not appeared effective until this report. Because the low pass rates have been an on-going problem and can take time to correct, it is imperative that the program continue analyzing all aspects of the program, from admissions to curriculum; implement significant changes; monitor carefully for results; make modifications if indicated; and provide detailed reports to the JRCNMT. Effective and urgent program changes are necessary to ensure graduates can obtain certification and enter the workforce as soon as possible upon program completion.

The program must undertake the following in the upcoming year:

- Submission of a satisfactory Pass Rate Progress Report, due no later than **March 1, 2024**. The report form is attached to the email that delivered this letter; and
- Submission of a satisfactory Annual Report, due no later than **August 1, 2024**.

At the JRCNMT meeting following submission of each report, the board will consider the information provided, paying particular attention to the thoroughness of the program's assessment process and documented follow-through on its commitment to making program changes that result in improved graduate outcomes, including certification exam pass rates. At the fall 2024 meeting, after both reports have been evaluated, the board may take one of three actions:

- remove probation if substantial compliance has been achieved;
- withdraw accreditation, which is subject to appeal, if the program continues to be deficient in meeting these standards; or
- extend probation for one additional year if the program demonstrates good cause in its efforts to come into compliance with the cited standards.

Reconsideration of Probation

In accordance with JRCNMT policy 2.800 (email attachment), an institution may request reconsideration of probation if it believes the factual accuracy of a deficiency is in question. The request, due by **November 29, 2023**, must include evidence demonstrating that a deficiency was cited in error.

If reconsideration is not requested prior to the stated deadline, notification of this decision will be forwarded to the institution's accrediting agency. The information will also be made available to the public through the JRCNMT website and its publications.

A program on probation is required to advise current and prospective students of the probationary status on its website and in publications according to JRCNMT policy 2.150, page 16 (email attachment). In addition, a program on probation may not add clinical affiliates or expand its student capacity until the probationary status has been removed, except when addition of clinical affiliates is necessary to address a cited deficiency.

Please contact the JRCNMT office if there are questions regarding the content of this letter.

Sincerely,

Jan M. Winn, M.Ed., RT(N), CNMT
Executive Director
